

Compatibility Table, Release 8.2

The table shows the firmware version for each 'Unit Type' sorted in 'Releases'. Each firmware version is marked with a colour code indicating the compatibility to the latest release.

Legend for compatibility colors: Compatible (green), Compatible but upgrade advisable using FUU Utility (yellow), Not compatible, upgrade needed using FUU Utility (orange), Not compatible, unit not supported anymore (red), Not Supported (black), and CU/CCU firmware version in previous releases (grey).

Main compatibility table with columns for Unit Type, Program, and Releases (8.2 through 4.5.3). Rows list various unit types like DIS-CCU, CU 5905, AM 6040, DC 5980, and DV 601F, with their respective firmware version compatibility across releases.

Feature Lic. table with columns for 'Yes' and 'No' status for various releases, corresponding to the main table's columns.
